

BRINGING RECOVERY SUPPORTS TO SCALE

Technical Assistance Center Strategy (BRSS TACS)

Deborah Delman, BS, CPS, has been the Executive Director of The Transformation Center, a Massachusetts “peer-operated” training, peer support, technical assistance, and policy center, since 1995. As a person with her own mental health and trauma recovery experience, she is passionate about the possibility of systems to increasingly support down-to-earth healing that is driven in the community by each person. Ms. Delman works with The Transformation Center board, community, and state partners to prioritize access to trauma-informed peer support with the understanding that trauma-informed communities are full of allies who work together to remove barriers, whether architectural, financial, institutional, or communicative.
