Bringing Recovery Supports to Scale

TECHNICAL ASSISTANCE CENTER STRATEGY

Anastasia Edmonston, MS, CRC, currently serves as the project coordinator for the Maryland Behavioral Health Administration's Federal Traumatic Brain Injury Partner Grant. In this capacity, she provides coordination of project initiatives, including training on the topics of traumatic brain injury; person-centered thinking and planning with a focus on the link between addiction and brain injury (for professionals who work in the fields of mental health and addiction); and aging services. Ms. Edmonston has worked in the field of rehabilitation services for individuals with traumatic and acquired brain injuries for over 30 years. She has been a case manager, program coordinator, advocate, and vocational rehabilitation counselor, and has experience in inpatient and outpatient settings. She obtained her master's degree in rehabilitation counseling from Boston University and is a Certified Rehabilitation Counselor. In 2014, Ms. Edmonston earned a postgraduate certificate in instructional systems development from the University of Maryland, Baltimore County.
